

SMT Temperature Profiling Accessory Kit

Temperature Profiling Accessory Kit

This kit includes all the accessories you need to profile PC boards through your reflow oven using your thermal profiling system. It is compatible with any ovens or profiling systems which use standard K-type thermocouples.

The kit includes three 6', 10' or 16' ready-to-attach thermocouples; high temperature solder; thermal compound; Kapton™ attachment dots and strips; complete instruction manual; and a handy 8" x 4" x 4" container for the kit.

- Use with any oven or profiling system which uses standard K-type thermocouples
- Includes all the accessories needed for thermal profiling
- Includes 6', 10', or 16' ready-to-attach thermocouples
- Complete "how-to" instruction manual
- Handy container for the kit
